CITY MAP
Map ................................................................................................................ 22
First time in Norrköping?
Then you have a fantastic city to discover!

In the heart of the city you’ll find our beautiful Industrial Landscape whose textile factories are long gone. Beautiful buildings are now home to the university and creative companies, restaurants and our concert hall.

Motala River’s swirling water flows through the city like its lifeblood offering tranquillity and challenges – you can even fish in the centre of the city! There are lots of salmon, and if you’re lucky you may even see them spawn in the salmon ladder in Strömparken.
Welcome to Norrköping

A characteristic feature of Norrköping is of course our yellow trams, which is a fun way to discover the city! Norrköping also offers a real shopping adventure. We have a town centre full of shopping malls, cafes and experiences. All within an enjoyable walking distance. When you’ve browsed in the malls along Drottninggatan, just keep walking a few blocks further where you’ll find small local boutiques with products from the region. If you don’t know the way you can always ask someone where Knäppingsborg is. Those of us who live in Norrköping are well acquainted with this antique neighbourhood, which has been restored to a charming area full of cozy cafes and restaurants, interior design shops and locally produced food. A short distance from Knäppingsborg is Gamla Stan, the Old Town, which offers more intimate small boutiques.

Norrköping has incredibly beautiful surroundings. The city is located next to Bräviken, which means that you are always close to the water. The deep forests of Kolmården can take you out on beautiful footpaths, and Kolmården Wildlife Park, the biggest wildlife park in Scandinavia, attracts thousands of visitors every year. Our archipelago has many unspoilt places that can be reached by kayak or Skärgårdslinjen, which operates cruises between the islands and skerries in the summer. We also recommend a tour to Vikbolandet, where you can eat ostrich and turkey and buy locally produced ice cream, surrounded by fertile fields. The tourist magnet Göta Canal is south of the city. If you don’t have a boat – why not cycle along the canal? As we’ve said, there is a lot to discover here.

We wish you a warm welcome to our city!
The Industrial Landscape

Few European cities can boast such a well preserved industrial area as Norrköping. The industrial development started in the 17th century and carried on through to the middle of the 20th century. Along the banks of the Motala Ström - the Motala River - a number of woollen spinning mills and cotton factories were established.

By the middle of the 19th century, Norrköping was the second largest industrial city in Sweden. Magnificent factory buildings are proof of the city’s industrial wealth. Today, none of these buildings are used in the way they were intended. The sound of the last spinning mill was heard in the middle of the 1970’s. The city has decided to preserve this area by putting much money and time into it.

Approximately 25,000 cactus plants are planted at the end of June every year. The motif is changed from year to year. The 2020 portrait celebrates the Norrköping Ski Team.
